What is the Learn Archicad! program?

The Learn Archicad! Program includes everything you need, to become a productive BIM Author; capable of modeling, documenting, scheduling and presenting your project in a collaborative environment.

There are 2 levels of courses included in the Learn Archicad! program. The foundation courses provide a strong fundamental understanding of Archicad and other Graphisoft products, earning you points towards becoming a Certified Archicad BIM User. Meanwhile, the advanced courses further enhance your knowledge and skills, guiding you towards the coveted title of Certified Archicad BIM Author.

With the Learn Archicad! Subscription, you'll enjoy continuous access to all our content for the duration of your subscription. Choose between our convenient monthly plan or opt for the annual plan, which grants you a full year of uninterrupted learning and growth.

Certifications

Become a Graphisoft Certified Archicad BIM User

A Certified Archicad BIM User understands the core concept of BIM and is able to use basic functions and features of Archicad. Obtain the certification by completing foundation courses and achieve a minimum score of 60% on quizzes or test your knowledge on the Archicad BIM User Certification Exam.

Become a Graphisoft Certified Archicad BIM Author

A Certified Archicad BIM Author understands the entire BIM workflow, is able to use all functions and features of Archicad and has project-level model authoring responsibilities. They can work in a collaborative environment using Teamwork and understand all BIM uses of a project file. Obtain the certification by completing foundation and advanced courses and achieve a minimum score of 60% on course tests and quizzes.

Certificate of Attendance

After completing advanced courses successfully, you will be awarded with a Certificate of Completion in PDF format, automatically issued after each course is completed.

Software Requirements

The exercise files in this bundle have been created using the International language version of Archicad which means that the work environment and some of the content may be different if you are using a different language version. To be able to follow along with the trainer, please make sure to download the latest version of Archicad!

Subscription Details

Subscription term

The term of this subscription plan is monthly / annual, which means that your subscription is going to automatically renew for the next month / year unless you cancel it before the subscription term ends.

Purchase process

The checkout process is the same as in case of buying any other purchasable items on the Graphisoft Learn Portal. When adding a subscription to your shopping cart, you can apply coupon codes in order to buy the subscription at a discounted price. Please be aware that subscriptions and one-time product purchases cannot be mixed in the same shopping cart. If you attempt to add a one-time product to a shopping cart containing a subscription, you will be asked if you wish to replace the subscription with a one-time product.

Subscription renewal

Subscription renewal and recurring payments are automated processes. Therefore, your bank card will be automatically charged at the beginning of the next subscription term, unless you cancel your subscription.

Failed payment

You will receive an automated 'past due' warning message 2 days (monthly) / 15 days (annual) after the payment was due if a payment for an existing subscription plan fails by any reason. Your subscription plan will be automatically cancelled, and you will lose access to the items included in your subscription if the payment is not fulfilled within the grace period: 5 days (monthly) / 20 days (annual) after the payment was due.

Cancellation

When you cancel a subscription plan, you are no longer billed. You will lose access to the items in your subscription at the end of the actual subscription term, and you will be deactivated from all the courses part of your subscription

Contents

Once you purchase the Learn Archicad! subscription you will instantly access all foundation-level courses:

Name	Format	Level	Duration
Archicad Knowledge Assessment	Online assessment test	Foundation	30 minutes
Beams and Columns in Archicad	Self-paced online course	Foundation	1 hour
Create Custom Objects with Archicad	Self-paced online course	Foundation	1 hour
Create Engaging Drawings with Archicad	Self-paced online course	Foundation	45 minutes
Create Fast Visualizations with Archicad	Self-paced online course	Foundation	1 hour
Curtain Walls in Archicad	Self-paced online course	Foundation	1.5 hours
Get Started with Conceptual Design in Archicad	Self-paced online course	Foundation	1 hour
Get Started with Interior Design in Archicad	Self-paced online course	Foundation	45 minutes
Get Started with Parametric Design in Archicad	Self-paced online course	Foundation	45 minutes
